**MITER ATTACHMENT**

**ASSEMBLY**

1. Remove the dust guard.

2. Pull the extension table out.

3. Line up the locator pin with hole in the table.

4. Set miter at 22.5° position.
Square the miter attachment to the table fence.

Tighten thumb screws on the side. NOTE: This sets the square and secures the miter attachment to the table.

Place tile up against the cutting fence.

Place iQ Quick Clamp into clamp socket (A) then rotate (B).

Adjust clamp to tile thickness to secure tile.

Make your cut. NOTE: A good work practice is to keep the blade sharp with a dressing stone for best cutting performance and accuracy.
